John,

Does USGS have the internal lab capability to analyze groundwater for isotopic U, Th, Ra using DOE EML U-02, EML Th-01 and EPA 903.0 MOD and 904.0, respectively? If so, we may want to use you rather than a third party lab to analyze future groundwater splits EPA may collect.

Thanks,
Daniel R. Gravatt, PG

Principles and integrity are expensive, but they are among the very few things worth having.
